FEBRUARY UPDATES

Dr Sai's office at AdventHealth received 2 crocheted blankets and 2 chemo hats in February. While delivering the chemo hats I was able to talk with the beautiful woman in the photo above. She told me she was diagnosed with cancer at the end of last year. The good news is she has completed her surgery/treatments and there is no signs of cancer. She did lose all of her hair and as a result she says her head is so cold at night she has to sleep with a sheet over her head! I just happened to have a few of the Material Girl's chemo hats with me. To her delight I told her I would love for her to choose some hats to keep her warm at night. She was truly grateful and she passed on her appreciation to all the ladies who make a difference in others lives during especially stressful times. Ladies we are making a difference, one person at a time.

The Flagler County Health Department, Infants and Children (WIC) program was thrilled to receive 15 bears, 14 baby hats, 7 booties/socks and 1 newborn bib (see photo, left.)
